Florentin Smarandache

2,565,000,000,000,000
This is a photoalbum from Greenland. It follows my instant photovideo journal Nopțiile Polare Inuite (Inuit Polar Nights), published by Agora Editions, Romania, 2018.

2,565,000,000,000,000 Tonne Ice Cube sits on top of Greenland, weighting 2.565 quadrillion tonnes, with its mean height of over 2 km, and over 3 km at its thickest point. The global sea levels would raise by 23 feet if the ice of Greenland were to melt.

Enjoy my photographic journey from a place where nobody hear you screaming!

FAR FROM CIVILIZATION
A DIFFERENT ALBATROS
ICE GLAZE
Rocking concubinage
GREENLADISH BLUE
PEOPLE AND TRACES
STATIC DIRECTIONS
THE CRASH

30
WHERE CLOUDY SHADOWS WANDER FREE
A halt in the nowhere
Shrieking to the echo
The Gaoler
THE FROLIC ARCHITECTURE OF THE SNOW
TINGES OF WHITE
NEIGHBORHOOD
THE CITY ON THE SHORE
OVER THE HILLS, AND FAR AWAY
WERE I LAID ON GREENLAND’S COAST...
A SQUINT FOR THE CAMERA
A TALE OF THE SEA
OLD LIFE
BIRD MOTHERHOOD
TRAVELING ICICLE
POLAR LIGHTS
SPRIGHTLINESS
Greenladish Settlement
flabbergasted
sea
103
