

FLORENTIN SMARANDACHE
**Mathematics and Alcohol
and God**

In Florentin Smarandache: “Collected Papers”, vol. II. Chisinau
(Moldova): Universitatea de Stat din Moldova, 1997.

MATHEMATICS AND ALCOHOL AND GOD

Imaginary

God

Transcendentality

What's the probability

for God to be

in Number Theory ?

Artificia Mathematica -

in order to kill the zero, the nothing

I don't like people who are happy, who had a great career (because it pushed on others and depersonalized them) - but those living unhappily, poorly, sickly and dying young.

If there exist irrational elements in man, then God exists. When we know what God is, we shall be gods ourselves (G.B.Show).

If there exist wars, genocides, then God does not exist.

If there exist sentences which cannot be proved or disproved within the system (K.Godel), then God exists.

"What's your religious beliefs?", and Lagrange answered: "I don't know"!

Mathematics and alcohol for God's sake, and instead of Him and to replace Him. Mystic Mathematics. Are science researchers guilty in front of God because of stealing Nature's secrets ?

God's Revolt

Mathematics' Revolt

Alcohol's Revolt

My revolt: I desire to create my own mathematics, new (and maybe strange, paradoxist) axioms - and put everything in it ! Develop an entire theory on this system of

anti-axioms. I'm writing the PARADOXIST MATHEMATICS

the PARADOXIST PHILOSOPHY

"Sommetimes great new ideas are born outside, not inside, the schools" (Dirk J. Struik).

God

Holy Mathematics with its fascinating infinite

Holy Alcohol with its degrees

Holy Philosophy

Music is sick in front of God

Picture is sick in front

Mathematics is sick

Creation is a drug I can't do without (Cecil B. Demille). Therefore: pray to God and drink because in this way you get closer to Him. Drink alcohol and solve diophantine equations !

CALCULATE - DRINK -PRAY

(This is not a paradox !)
