THE VOYAGER
via(tor) sine fine

[Map of the world]
An Introductory Note

The series of photoalbums THE VOYAGER summarizes in images Florentin Smarandache’s voyages around the globe.

This first volume briefly depicts voyages in North America (United Mexican States and Canada), South America (Republic of Peru, Federative Republic of Brazil, Argentine Republic, Republic of Colombia), Central America (Commonwealth of the Bahamas, Jamaica, Republic of Nicaragua, Dominican Republic), Europe (Italian Republic, Republic of Bulgaria, Russian Federation, Greece, France, Kingdom of Spain, Federal Republic of Germany, Kingdom of Denmark, Iceland, Portuguese Republic), Asia (Republic of Turkey, Republic of India, Republic of Indonesia, People’s Republic of China, Taiwan, Japan, Socialist Republic of Vietnam, South Korea, Islamic Republic of Pakistan, Kingdom of Saudi Arabia), Africa (Federal Republic of Nigeria), Oceania (Commonwealth of Australia, Collectivity of French Polynesia), Artic & Antarctic (Antarctica, Greenland), and Galápagos Islands (part of the Republic of Ecuador), travel that lead Smaradache to propose A Theory of Neutrosophic Evolution.
The photographs are arranged chronologically in subchapters, and date back as far as 1988; everywhere a voyage gave birth to a travel diary, its book cover was added.

The scientist and writer Smarandache is, in his own words, an infinite traveler (*viator sine fine*) on a road to infinity (*via sine fine*).

Whoever is curious to draw his travels on the map, will discover that it is not long before the Math professor from University of New Mexico will exclaim, in Seneca’s words: *nec sit terris ultima Thule* (nor shall Thule be the extremity of the world)!
