APH(L)ORISMS

This collection of “aphlorisms” resulted from a search in my old manuscripts. At that time I was preoccupied everyday with noting down in my little notebook various interesting-to-me expressions that I heard or that came to my mind.

Etymologically, *aphorism* + *floral* = *aph(L)orism*, which is a short reflection written on a floral design, or a short poetry accompanied by an artistic background. They are colorful contemplations.

*Maximus in minimis* (Lat.) means very much in very little [max in min], or condensed thought, or ideating essence. They are actually maxims, adages, sayings mostly in one line (uni-stich) with a title, as a metaphoric statement, a breathing momentum that oils our soul.

The Romanian poet Ion Pillat (1891-1945) has published a volume of verses in 1936, just called “Poems in one line”, while I similarly published the book “Through Tunnels of Words” (trilingual: Romanian-French-English) in 1997 with one-verse lyrics.

Apollinaire (1880-1918) has invented the “calligrammes” (1918), where the poem’s verses were spread on the page in the shape of the object/thing that the poem talked about.

This volume also gives shapes to the aphlorisms by framing them into various geometrical figures.

Rambling
The poetical of non-poetic...
This collection of “aphlorisms” resulted from a search in my old manuscripts. At that time I was preoccupied everyday with noting down in my little notebook various interesting-to-me expressions that I heard or that came to my mind.

Etymologically, *aphorism + floral = aph(L)orism*, which is a short reflection written on a floral design, or a short poetry accompanied by an artistic background. They are colorful contemplations.

*Maximus in minimis* (Lat.) means very much in very little [max in min], or condensed thought, or ideating essence. They are actually maxims, adages, sayings mostly in one line (uni-stich) with a title, as a metaphoric statement, a breathing momentum that oils our soul.

This volume gives shapes to the aphlorisms by framing them into various geometrical figures.
